Specification

Model	Print Area	Print Head Outline Dimensions
CM-MKV/25	24mm x 24mm	170mm x 155mm x 85mm
CM-MKV/38	37mm x 37mm	170mm x 155mm x 85mm
CM-MKV/50	24mm x 48mm	170mm x 155mm x 85mm

Manually operated coding

For manually marking a product, the free standing Codamark bench model comes complete with coding head and control module mounted in a stainless steel cabinet.

Accurate positioning guides with integral switch allows an operator to achieve quality printing at high speed.

Manual Coding

Clear and precise product marking achieved efficiently and economically with the *Codamark Pneumatic Reciprocating Printer.*

Printing with the light touch

High speeds can be achieved with a low print pressure of 10-20 psi enabling the Codamark to print with a light touch without product damage.

Stainless steel components makes Codamark ideal for the food industry.

Quick change Baselock type holders

The print head is fitted with a type holder that can be changed in seconds. Spare holders can be used to pre-set Baselock rubber type. Special holders are available for recessed or concave surfaces.

Clean inking system

A clean fast drying ink cartridge is fitted to the print head giving drying times of seconds on most surfaces. The sealed cartridge ensures the operator never touches any ink.

Control system

Three Control Modules are available depending on the input signal used, pneumatic or electrical. Each has simple adjustments to optimise the print at speeds up to 180 products per minute.

Versatile Mounting

The small print head can be mounted at any angle to suit the product. Versatile mounting kits are available.

Codamark data sheets

Further information is available on data sheets giving dimensions, control systems and mounting positions.
