Sauven 

www.sauven-marking.com

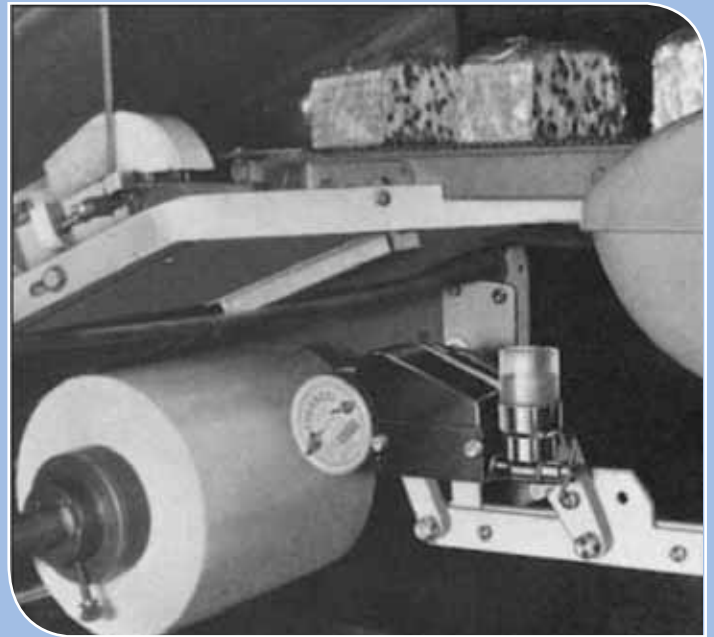

The unit is simply attached to any parent machine.

Type drums are suitable for use with Baselock type or flat stereos.

Special fast-drying flexographic inks are supplied to suit all applications.

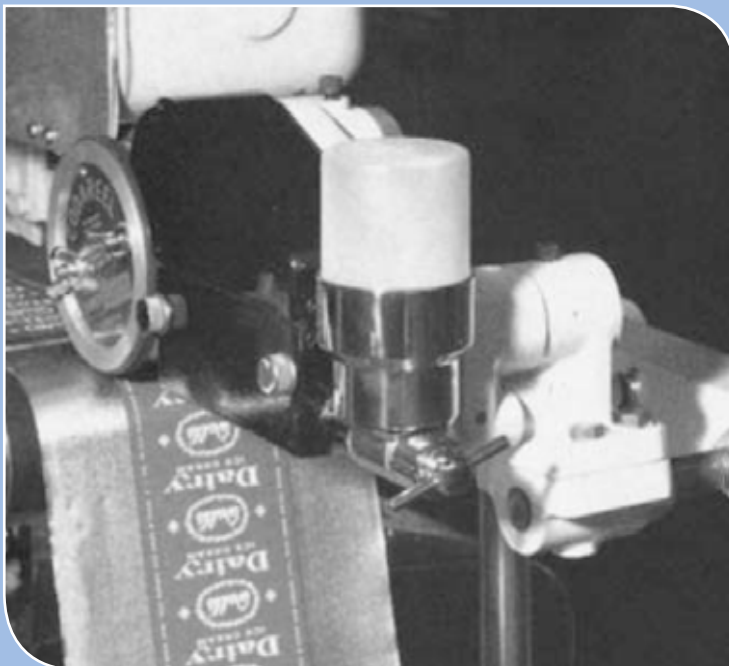

The type drum rotates by frictional contact with material being marked to give random or continuous print.

Alternatively a drive shaft may be fitted so that the type drum can be driven from a parent machine.

Model 1201 fitted with parallel arm mounting

Fitted with special parallel arm mounting bracket which keeps the unit horizontal and in contact with the diminishing reel of film. A plunger on rear arm holds the unit back whilst renewing the reel.

Model 1201 on a continuous reel-fed machine

Fitted with the standard mounting bracket which is pivoted at the back of the unit. The unit must be mounted horizontally where the film is taken over a free-running roller.

Model	Type Drum Circumference	Print Width
1201	12" /305mm	1" /25mm
1202	12" /305mm	2" /50mm
1203	12" /305mm	3" /75mm
1801	18" /458mm	1" /25mm
1802	18" /458mm	2" /50mm
1803	18" /458mm	3" /75mm
